Demonstration User Manual

GitHub Project: Python2-Django-REST-API

Date: April 21, 2018

Acknowledgement: This work was performed within the Department of Computer Science (MT2521) project, which is supported by the Electrical and computer Sciences Engineering department. This is not an individual work we as 1D group combined our expertise field and produce this work.

Outline

Group Members

Group members positions and responsibilities

Wireless Platform

Key Factors and Components

Best and Worst Performance Based on Positioning

Implementation

Neural Network Algorithm Implementation

Summary

Key points repetition

Bibliography

SNMP group members

► Positions

► > Athanasios Garyfalos (Project Manager)

► > Taha Mohammad (Research and Development RnD)

► > Jaroslaw Rykaczewski (Software Engineering)

► Responsibilities

► > Planning-executing-closing the project based on deadlines.

► > Develop new ideas and products. Will give us the competitive edge.

► > Develop and implement the ideas of the RnD.

SNMP group members

- ▶ Positions
 - ▶ > Athanasios Garyfalos (**Project Manager**)
 - ▶ > **Taha Mohammad (Research and Development RnD)**
 - ▶ > Jaroslaw Rykaczewski (**Software Engineering**)
- ▶ Responsibilities
 - ▶ > Planning-executing-closing the project based on deadlines.
 - ▶ > **Develop new ideas and products. Will give us the competitive edge.**
 - ▶ > Develop and implement the ideas of the RnD.

SNMP group members

- ▶ Positions
 - ▶ > Athanasios Garyfalos (**Project Manager**)
 - ▶ > Taha Mohammad (**Research and Development RnD**)
 - ▶ > Jaroslaw Rykaczewski (**Software Engineering**)
- ▶ Responsibilities
 - ▶ > Planning-executing-closing the project based on deadlines.
 - ▶ > Develop new ideas and products. Will give us the competitive edge.
 - ▶ > **Develop and implement the ideas of the RnD.**

Hardware Description

- ▶ Single component of the base winding Figure: 1a.
- ▶ Receiver platform values Figure: 1b.
- ▶ Worst coupling position Figure: 1c.
- ▶ Best coupling position Figure: 1d.

(a) Single Transmitter Winding

Figure 1: Project Positioning Analysis

Hardware Description

- ▶ Single component of the base winding Figure: 1a.
- ▶ Receiver platform values Figure: 1b.
- ▶ Worst coupling position Figure: 1c.
- ▶ Best coupling position Figure: 1d.

(a) Receiver Parameters Values

Figure 1: Project Positioning Analysis

Hardware Description

- ▶ Single component of the base winding Figure: 1a.
- ▶ Receiver platform values Figure: 1b.
- ▶ **Worst coupling position Figure: 1c.**
- ▶ Best coupling position Figure: 1d.

(a) Worst Coupling Positioning

Figure 1: Project Positioning Analysis

Hardware Description

- ▶ Single component of the base winding Figure: 1a.
- ▶ Receiver platform values Figure: 1b.
- ▶ Worst coupling position Figure: 1c.
- ▶ **Best coupling position Figure: 1d.**

(a) Best Coupling Positioning

Figure 1: Project Positioning Analysis

Theory Vs Practical Experimentation

- ▶ Best Position Simulation (●)
- ▶ Worst Position Simulation (■)
- ▶ Best Position Measured (●)
- ▶ Worst Position Measured (■)
- ▶ Simulation is a perfect line, in "Theory"
- ▶ Practical measuring shows "150KHz"!

Figure 2: Simulation Vs Real Time Efficiency [2]

Theory Vs Practical Experimentation

- ▶ Best Position Simulation (●)
- ▶ Worst Position Simulation (■)
- ▶ Best Position Measured (●)
- ▶ Worst Position Measured (■)
- ▶ Simulation is a perfect line, in "Theory"
- ▶ Practical measuring shows "150KHz"!

(a) Free Positioning

Figure 3: Different wireless charging approaches [2]

- > Free positioning charging based on Inductive coupling [1].

(a) Free Positioning

(b) Neural Network

Figure 3: Different wireless charging approaches [2]

- ▶ > Free positioning charging based on Inductive coupling [1].
- ▶ > Based on RLoad and Frequency Input and Output [1].

(a) Free Positioning

(b) Neural Network

(c) Matlab Output

Figure 3: Different wireless charging approaches [2]

- ▶ > Free positioning charging based on Inductive coupling [1].
- ▶ > Based on RLoad and Frequency Input and Output [1].
- ▶ > **Simulation of Matlab Output based on RLoad as an Input [1].**

Summary

- ▶ In section “Group Members” page “3” we mentioned member positions and responsibilities.
- ▶ In section “Wireless Platform” page “4” we mentioned hardware components and best/worst positions.
- ▶ In section “Implementation” page “5” we mentioned our approach and proposed solution to the problem

Extra Notes

- ▶ We have a Codecademy paper and a Presentation which we will use to explain the project.
- ▶ We have a video which we will use to explain the project.
- ▶ We have a video which we will use to explain the project.

Summary

- ▶ In section “Group Members” page “3” we mentioned member positions and responsibilities.
- ▶ In section “Wireless Platform” page “4” we mentioned hardware components and best/worst positions.
- ▶ In section “Implementation” page “5” we mentioned our approach and proposed solution to the problem

Extra Notes

Summary

- ▶ In section “Group Members” page “3” we mentioned member positions and responsibilities.
- ▶ In section “Wireless Platform” page “4” we mentioned hardware components and best/worst positions.
- ▶ In section “Implementation” page “5” we mentioned our approach and proposed solution to the problem

Extra Notes

- ✱ Both the Conference paper and the Presentation where written in **LaTeX**

Summary

- ▶ In section “Group Members” page “3” we mentioned member positions and responsibilities.
- ▶ In section “Wireless Platform” page “4” we mentioned hardware components and best/worst positions.
- ▶ In section “Implementation” page “5” we mentioned our approach and proposed solution to the problem

Extra Notes

- ▶ Both the Conference paper and the Presentation where written in **WTeX**
- ▶ Due to the quality of the output it exceeds our expectations! [3]

Summary

- ▶ In section “Group Members” page “3” we mentioned member positions and responsibilities.
- ▶ In section “Wireless Platform” page “4” we mentioned hardware components and best/worst positions.
- ▶ In section “Implementation” page “5” we mentioned our approach and proposed solution to the problem

Extra Notes

- ▶ Both the Conference paper and the Presentation where written in **L^AT_EX**
- ▶ Due to the quality of the output it exceeds our expectations! [3]

Summary

- ▶ In section “Group Members” page “3” we mentioned member positions and responsibilities.
- ▶ In section “Wireless Platform” page “4” we mentioned hardware components and best/worst positions.
- ▶ In section “Implementation” page “5” we mentioned our approach and proposed solution to the problem

Extra Notes

- ▶ Both the Conference paper and the Presentation where written in **L^AT_EX**
- ▶ Due to the quality of the output it exceeds our expectations! [3]

- ▶ Thanks a lot – questions & comments?
